

Slushie Machine instructions

Set up

- Slushie Machine
- Cups
- Straws
- Soft drink of choice (coke works well)

How to Use:

- Plug machine in and turn on
- Pour in soft drink
- To dispense pull down the nozzles

Notes:

- ALLOW PLENTY OF TIME FOR SLUSHIE TO FREEZE
- We recommend 30-45 minutes, so set this up first and let it chill.

Pack Up:

- Empty remaining slush from the machine
- Get a bucket of water with a little detergent in it and pour into the machine, allow the turners to mix it around then drain the soapy water out. Rinse in the same fashion with clean water until no more suds are showing.
- Turn machine off
- Wipe down machine and empty catchment areas
